S~~SECRET~~/NOFORN-SKEET CHANNELS ONLYPROJECT SUN STREAK (U)WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

Control Number	:	8706
Date of Session	:	09Apr87
Date of Report	:	09Apr87
Source Identifier	:	003

1. (S/NF/SK) Tasking: See tasking data sheet, attached. Ops officer and monitor engaged in a post-session discussion dealing with this source's 07 April 87 session. Ops officer suggested several avenues of approach for eliciting additional source information which were noted and acted upon by monitor in this session.

2. (S/NF/SK) Session: No source inclemencies. Source felt (and acted) particularly confident during this session. Monitor attaches a high confidence level also. Much of the session was spent in S6 (see source sketches, including AOL sketch of overall "system").

3. (S/NF/SK) Summary: (Please examine site terrain/local sketches and related item descriptors). Target structure seems to be temporary, (like a "mobile TOC") while construction takes place, but will be replaced by a permanent structure which will perform the same, but enhanced, functions--a concept here of directing/command and control. Site is removed from inhabited areas to avoid collateral damage in the event of conflict. The entire, integral structure exists to house and protect the "core" system which is the operational portion. The core is an amalgamation of subsystems which function synergetically in a conceptually new way. Associated with the system are the ideas of electrical, electronic, energetic, immense power which goes out from the structure, coherent, directive, cohesive, combined, and "focused". Descriptors associated with the [business end] of the system are red, reflective, shiny, circumscribed, containing, embracing, holding, preparing, propelling, collecting, bringing together; there are a series of reflectings, bouncing back and forth. The central structure is rounded, angled, tapered, flat, tall, latticed, buttressed, and girdled. (See source's A/S sketch, p.4a, and conceptual diagram of p.5a). The power which enters the structure becomes transformed, phased, matched, coupled, reinforced, boosted, collected, magnified, changed, "modulated", and propelled away.

CLASSIFIED BY: DIA-DT
DECLASSIFY : OADR

~~SECRET~~/NOFORN-SKEET CHANNELS ONLY

4. (S/NF/SK) Feedback: Monitor suffered the usual questions from this source: "Do you know anything about this target ?, etc., etc., ad infinitum, ad nauseam. Source was informed that further sessions would be based upon ops officer feedback. No other feedback provided.

Project FY 8706

Interviewer/Monitor Tasking

1. Describe (locate and identify) any "new" activity in the 'industrial-like' complex of structures VIC: SG1A

2. To be announced

Note: This place is like Disneyland, so work slowly and carefully.

S412 will be replaced by permanent structure which will perform
same function with other enhanced abilities. Concept
of direct day to command + control

S412 impulsive Site is removed from inhabited areas to
avoid collateral damage in event of conflict.

S412 Protection Structure exists to house + protect the ~~the~~
"core" system which is the operational portion. Entire
structure is integral. Core is amalgamation of subsystems
synergistic in function. New concept: Electrical; electronic
bulky; immense power. Power doesn't stay. It goes out.

in event of conflict. Extent of Central Structure of interest intended to
house & protect central "core" system which is made of sub-systems
electrical, electronic, energetic - working together in a synergistic
fashion under a newly developed concept of operation. Employ
high power levels. Power doesn't stay w/ structure, but is
transformed, phased, matched, coupled, reinforced, boosted, collected,
and propelled away.
